Teaching Experience

Instructor of Record:

Quantitative Methods of Social Research	1 section
This introductory statistics course teaches logic, interpretation, and estimation of quantitative tools. The course begins with hypotheses and measurement and ends with correlation and regression analysis. Emphasis is on interpretation, application, and the hands-on use of statistical software. <i>MWF semester schedule.</i>	
Research Methods in the Social Sciences	1 section
Comprehensive introduction to research methods covering approaches on both ends of the quantitative (e.g., surveys, experiments)/qualitative (e.g., ethnographies, in-depth interviews) spectrum, social networks, the research process, and research dissemination, with special attention to the consumption and critical analysis of social research. <i>MTWHF summer schedule.</i>	
Personality and Social Structure	2 sections
3000-level course focused on bi-directional influence of social structure and the person, the shaping power of subjective experience, and the understanding of these experiences as shaped by perceiver location within social structure. Emphasis on applications of sociological research, with discussion of principles and theories evidenced in and applied to concrete examples in everyday life. <i>MWF semester schedule.</i>	

Social Interaction 2 sections
 Discussion-oriented 2000-level course with heavy use of activities and introspective writing assignments; students learn the heuristics and processes of cognition and self as embedded in society. *MWF semester schedule.*

Facial Action Coding System Researcher Training Seminar 1 section
 This seminar trains new researchers on the Facial Action Coding System for use in experimental emotions research; culminates in FACS certification examination for all students. *MTWTF full day seminar schedule.*

Guest Lecturer, other courses:

Research Methods in the Social Sciences Summer 2018
 Spring 2019
 Upper-level course guest lectures covering experimental design (control groups, deception, socially-reactive subject matter): its pitfalls (social desirability, researcher effects, operationalization concerns) and its ethical considerations, with examples from experience and literature.

Teaching Assistant:

Experimental Research in Sociology (Dr. Justine E. Tinkler) Fall 2016
 Taught new undergraduate researchers in experimental methods; served as their trainer and mentor in applied research during the laboratory-immersive second half of the semester.

Sociology of Alcohol and Drug Use (Dr. Paul Roman) Fall 2016
 Mentored group research projects; responsible for grading; served as student liaison; provided one-on-one tutoring with struggling students.
